- Mr. Esposito oversees 150 technology professionals within the IT division including technology planning and deployment services, technical competitive positioning, business systems user support and technology call center operations, software development, quality assurance and testing, data warehousing, data center operations, LAN/WAN services, telecommunications and technical security services.

MasterCard International**1994-1996****Vice President, Information Technology (1995-1996)****Purchase, NY****Director, Information Technology (1994-1995)**

- Primary accomplishments included developing strategic information technology plans and directing multiple IT projects to support and automate corporate and regional business functions.
- A key accomplishment included the design and development of MasterCard's data warehouse and supporting information-processing platform (known as MasterCard Online). Further accomplishments included developing standardized data architecture, centralizing fragmented transaction systems, and implementing multiple online information-based products and services.
- Additional responsibilities included competitive technology positioning, process analysis, data modeling, technical design and development, system testing, installation and day-to-day management of functional and technical areas.
- Honored with MasterCard's 1995 CEO Global Technology and Innovation Award.

James Martin Consulting**1992-1994****Management Consultant****Reston, VA**

- Provided hands-on technical, functional and managerial consulting services for several critical engagements for federal and commercial clients.
- Developed complex data models and database designs in support of sophisticated business practices and information needs for internal and external customers and conducted business process reengineering and business system design projects.
- Engagements varied in size and involved the use of James Martin's information engineering methodologies and techniques.
- Completed all projects within budget and scheduled timeframes and exceeded customer satisfaction ratings.

PriceWaterhouseCoopers
Manager (1990-1992)
Senior Consultant (1987-1990)
Staff Consultant (1984-1987)

1984-1992
Washington, DC

- Provided technical, functional, and managerial IT consulting services for numerous public sector clients over a seven-year period.
- Engagements varied in size and complexity and ranged from \$250,000 to \$25,000,000 in consulting fees.
- Began as a junior programmer and advanced to an IT manager responsible for multi-million dollar engagements.
- Experiences ranged from specific development stages to full system life cycle implementations for custom software and packaged applications using structured development methodologies.
